

# Bata underwater

Bata

# underwater

Many plants and  
animals live  
underwater.

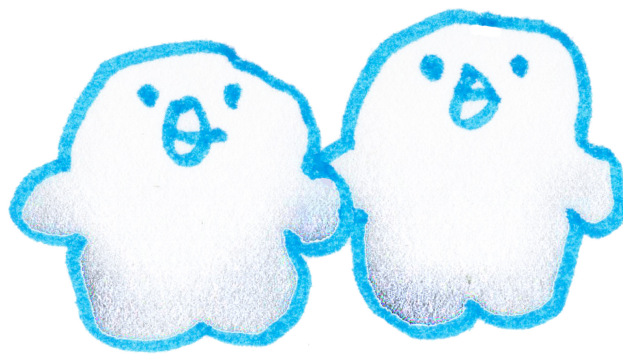

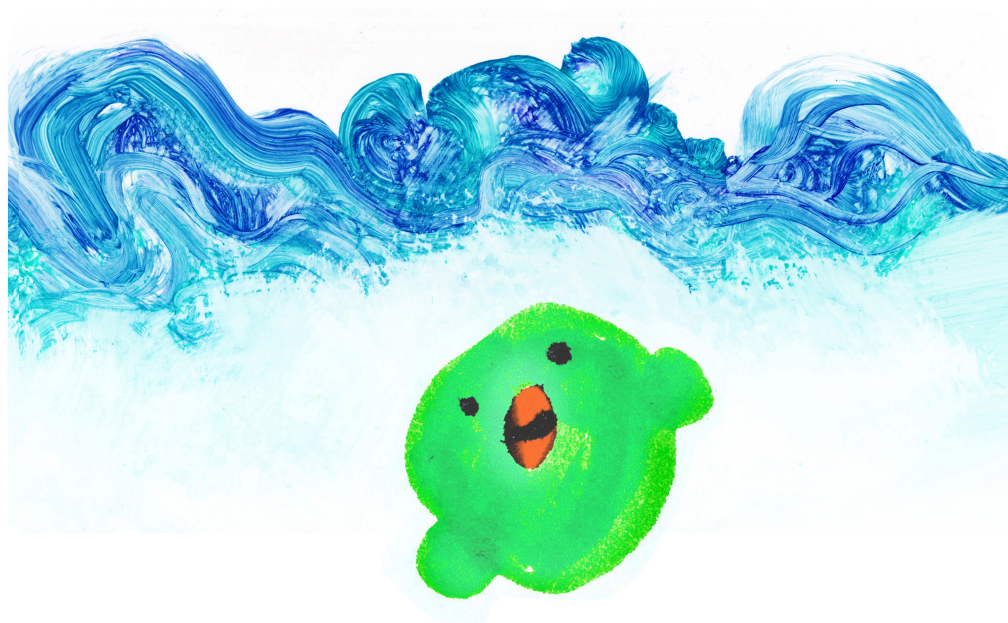

Batas live  
underwater, too!

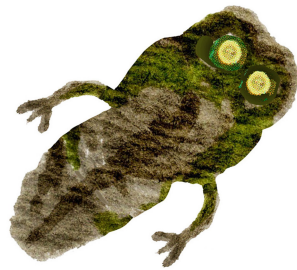

Batas are gentle  
nature spirits.

Their positive energy  
helps things grow!

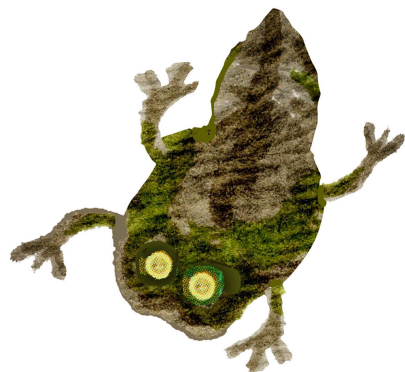

Tadpoles start out  
with no legs at all.

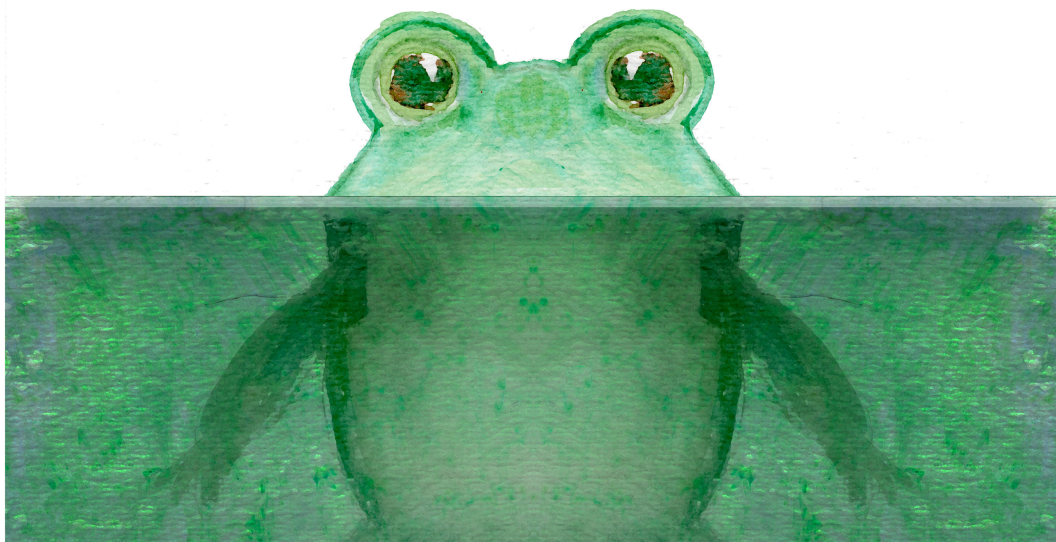

Then they  
grow  
two legs ...

... then,  
two  
more ...

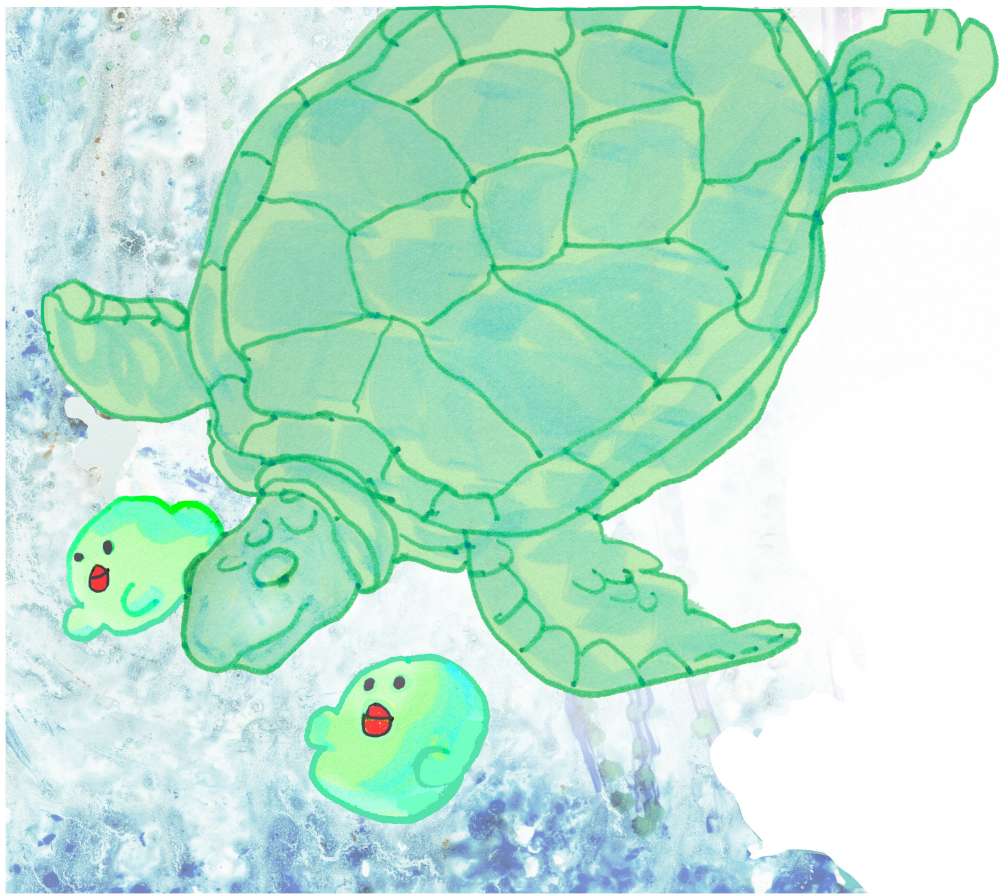

Until, one day,  
they are a frog.

Fish are happy  
when batas  
come to visit.

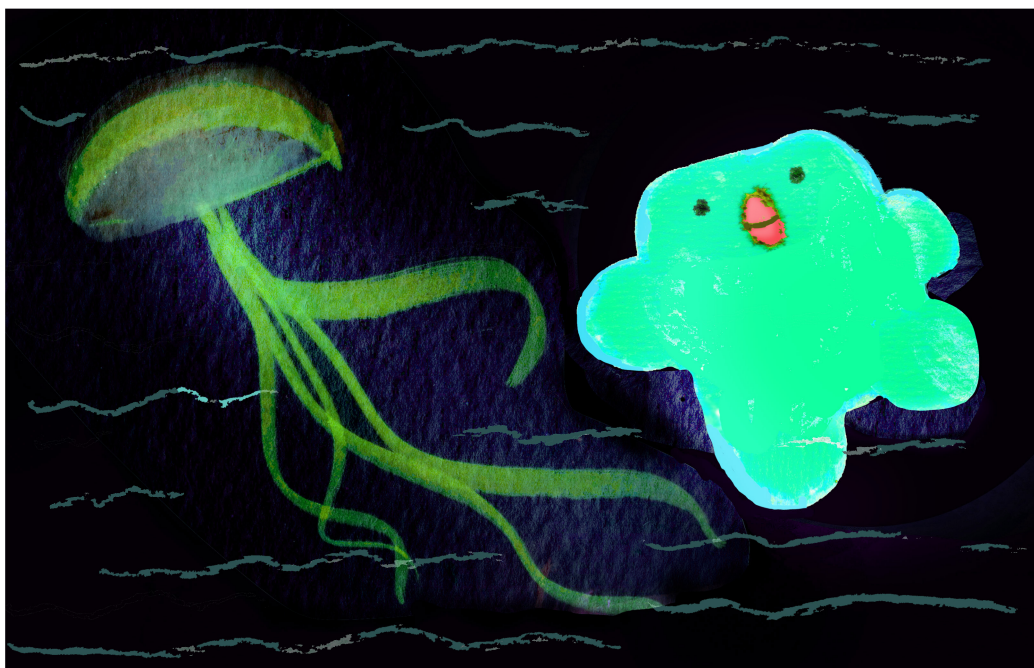

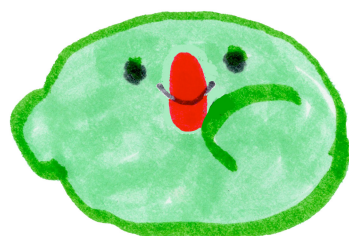

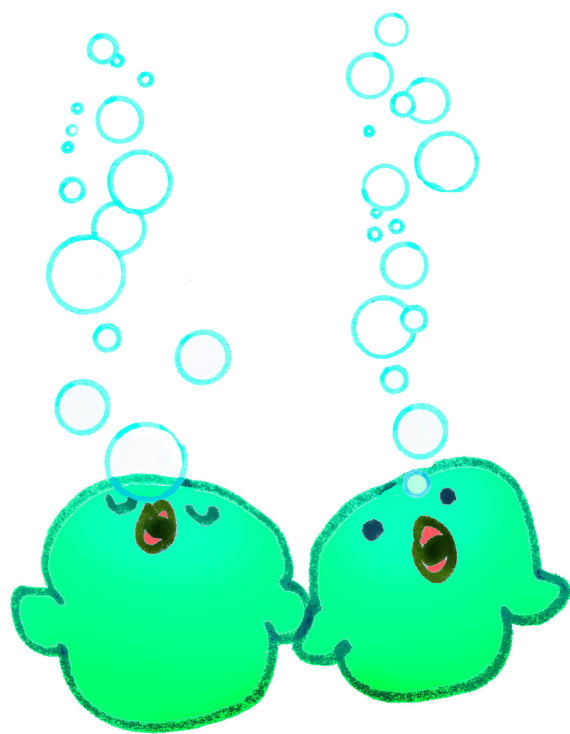

Two batas cheer  
up a turtle.

This bata  
does  
the jellyfish  
dance.

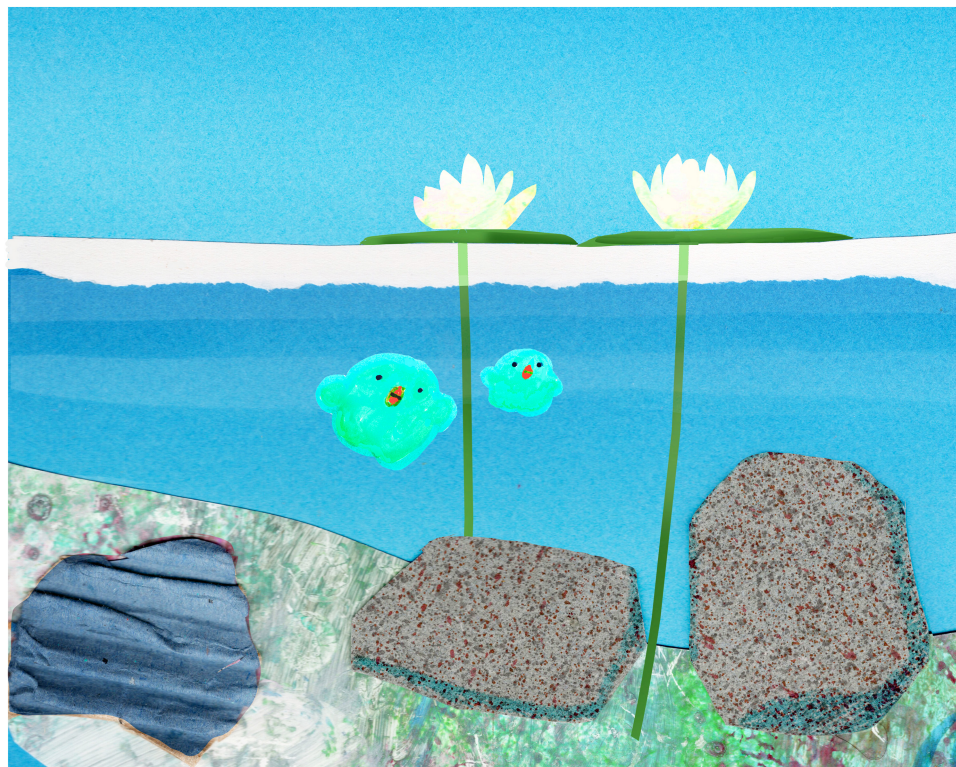

Batas make bubbles  
when they sing.

Batas line up for  
fish rides.

Batas say 'hi' to  
the water lillies.

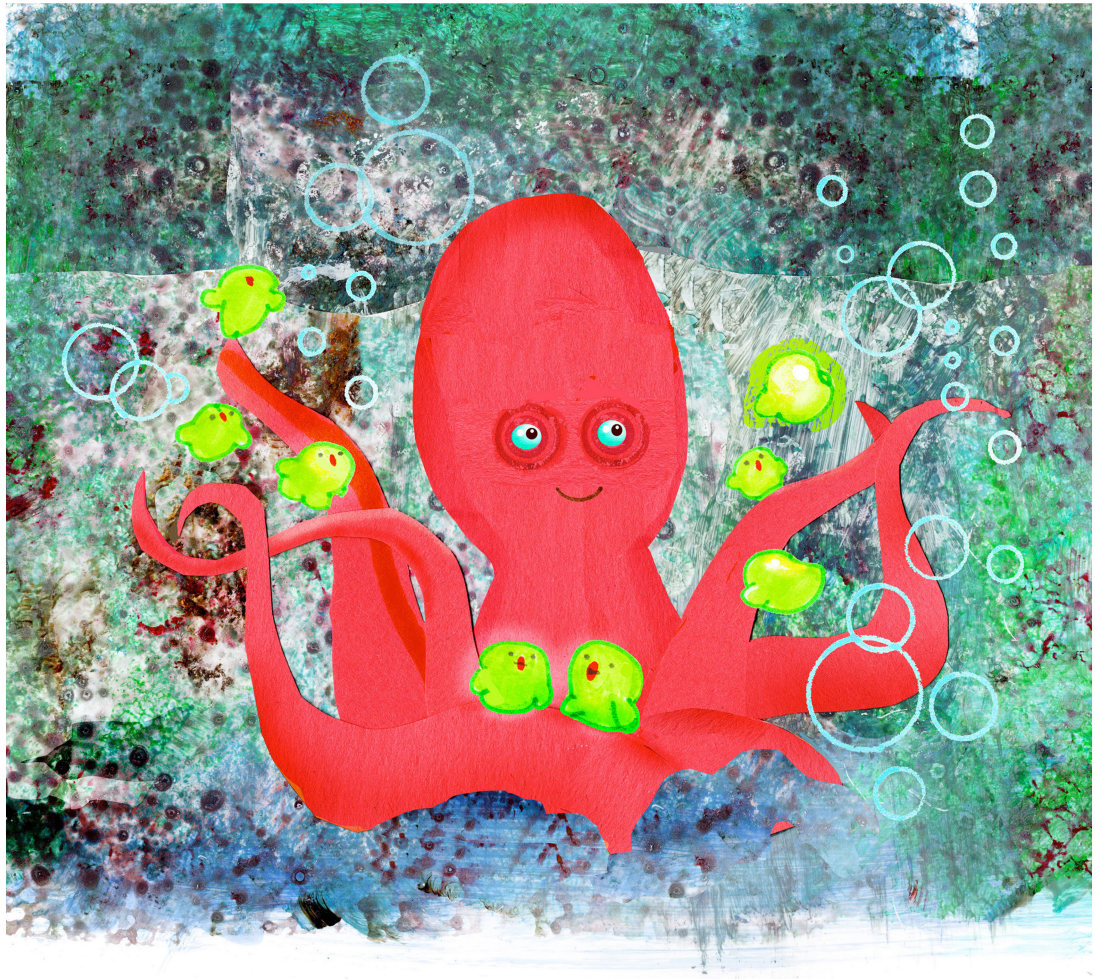

Batas play hide-and-  
seek with the fishes.

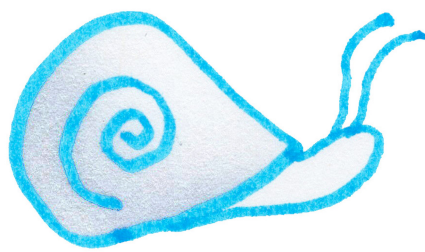

Batas are happy  
chatting with an  
octopus in the  
ocean.

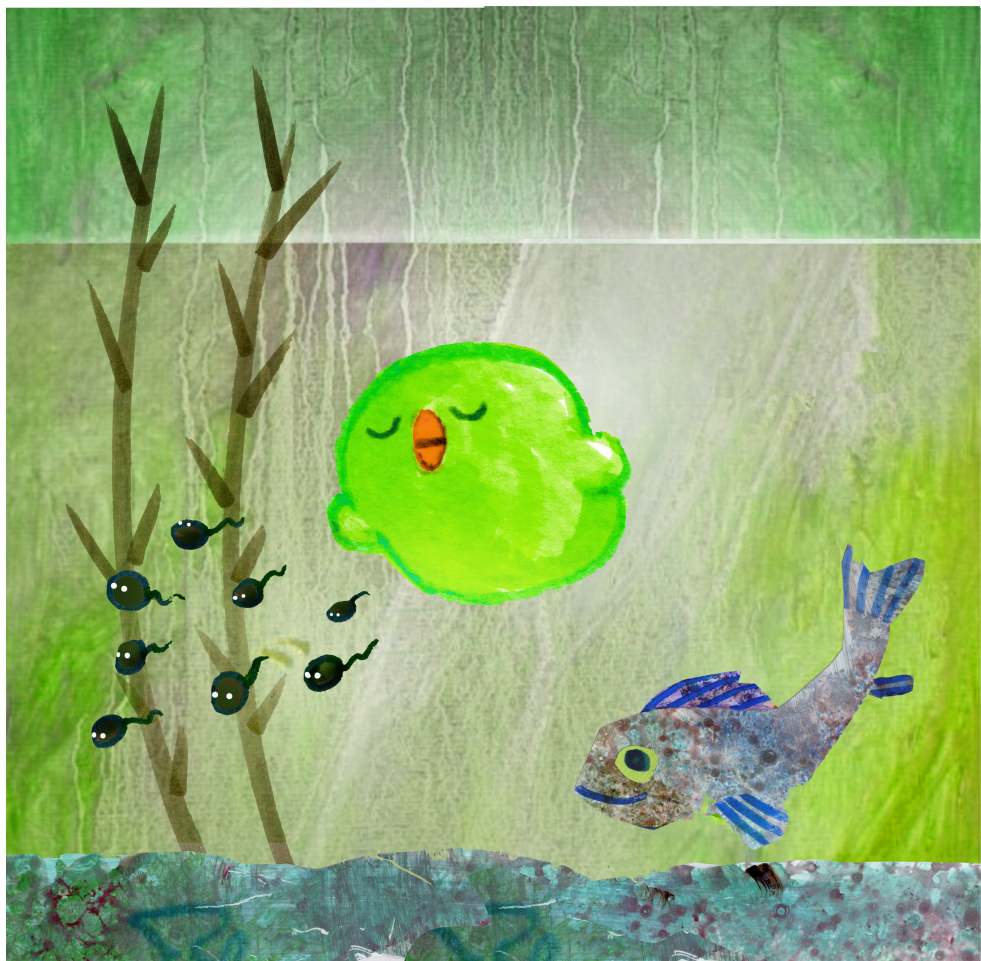

They are happy  
baby-sitting  
the polliwogs  
in a pond.

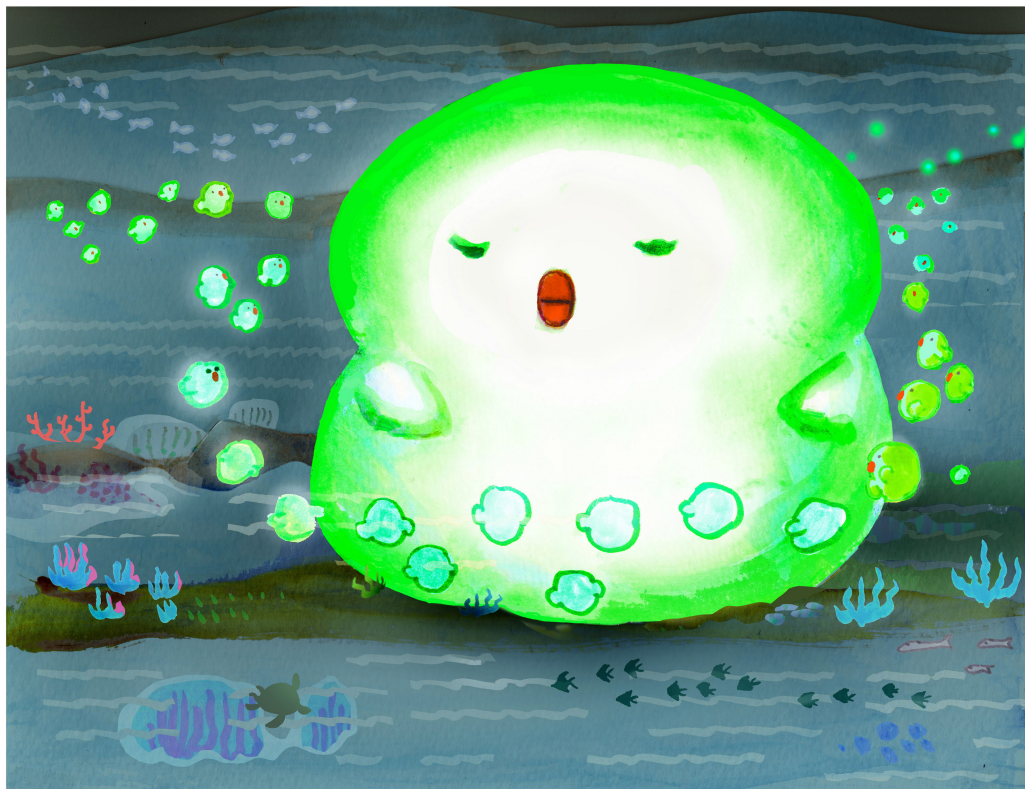

Deep-sea batas are  
very large.

They fill the  
ocean with their  
positive vibes!

Batas wish  
you happiness  
and peace.
